# Jackson Square. Part of Hamilton's New Age.

The New Standard Life Centre, brings to Jackson Square more stores, boutiques, cafes and restaurants. An awesome 14 storey garden atrium spirals down to a waterfall, an indoor skating rink, trees and fountains.

The New Standard Life Centre. In the heart of Hamilton's striking new downtown core. A tribute to this city's quantum leap into a new age.

# THE 8.9 BILLION DOLLAR MARKET

Exciting, dynamic, on the move is the best way to describe the Hamilton/Burlington market. With over a half a million in population, Hamilton is ranked the third largest market in Ontario with a per capita income 14% above the Canadian average.

When it comes to reaching this market, no other media comes close to The Spectator's 75% penetration. The Spectator is the paper of record.

**Nobody covers the market like  
The Hamilton Spectator**

# Working to keep Canada on the move and growing...

A bold new future in the agricultural equipment industry has arrived, thanks to the heritage of the past and the combination of two great companies, J I Case and International Harvester.

As part of the new, larger Case organization, the Hamilton plant will continue to produce quality agricultural equipment and implements unsurpassed in design, manufacture, reliability and value, just as it has since 1903.

Headquartered in Racine, Wisconsin, J I Case is a leading manufacturer and marketer of agricultural, construction and

utility equipment worldwide.

Case is an affiliate of Tenneco Inc., the 19th largest industrial corporation in America. With major operations in natural gas, integrated oil, pipelines, automotive components, shipbuilding, chemicals, packaging, life insurance, and agricultural/land management, Tenneco is committed to making Case the best in the industry.

We are J I Case... Still hard at work, keeping Canadians on the move—while helping Canada grow and prosper.

# **D**OFASCO **IN THE NEW AGE OF STEEL**

**Canada's largest producer of flat rolled steel is meeting new customer needs through a commitment to world-class skills and technology.**

New technology is helping Dofasco people respond to growing customer needs for more sophisticated grades of steel.

For example, a \$750 million investment in state-of-the-art continuous casting and related facilities will give Dofasco the first system in North America designed for the efficiencies of direct rolling.

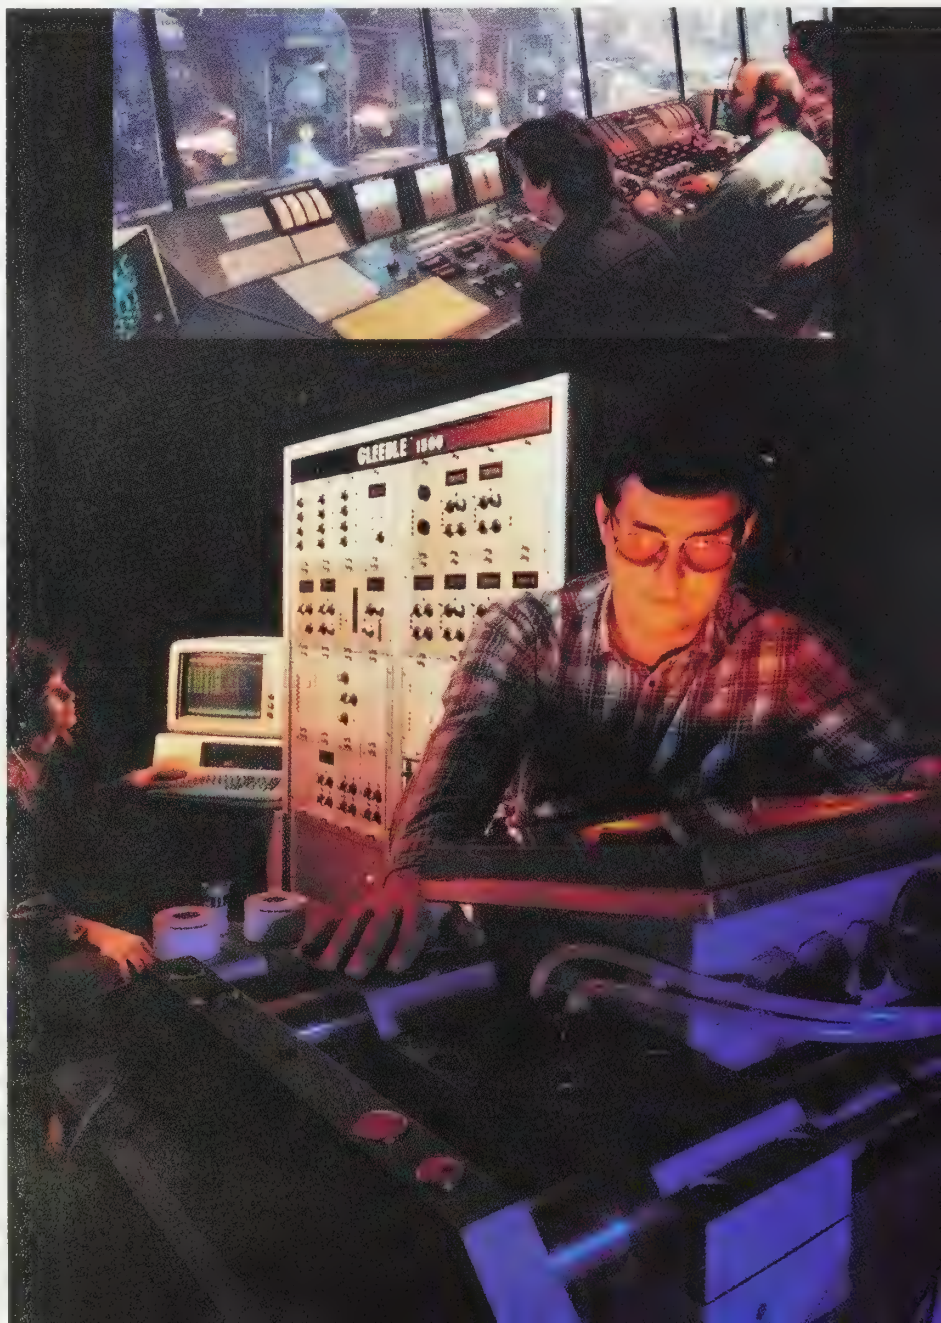

Other technologies being used include the Gleeble 1500 that can, among other research functions, predict the microstructure that will result from specific rolling cycles and temperatures. An infra-red camera helps operators monitor steel temperature during the rolling process. The Quantitative Image Analyser gives quality control specialists a near instant reading of molecular structure.

A company-wide commitment to Statistical Process Control is further evidence that Dofasco people are meeting the challenges of the new age of steel.

Dofasco Inc., P.O. Box 460,  
Hamilton, Ontario L8N 3J5.

The Gleeble 1500 is a versatile tool that enables Dofasco researchers to simulate key steps in the steelmaking process.

Operators on our No. 2 hot rolling mill know how to make the most of its advanced process control technology.

## KNOW THE DIFFERENCE?

Apples and oranges have a definite taste difference. In insurance there is a distinct difference between a person who sells insurance and a professional broker. We, as insurance professionals, explain in detail what your policy covers, provide you

with recommendations, work with you to insure your individual needs and obtain quotations from MANY insurance companies entirely for you.

There is more to insurance than just a policy. At Binns Insurance we know the difference.

**The Name Says It All!**  
Simply the "best all season steel-belted radial" tire Firestone has ever built. General Motors and The Ford Motor Co. specified the Firestone Supreme for their 1985 models to the tune of over 8 million tires.

This high-tech generated design meets or beats 14 performance specifications of Canada's leading car manufacturers. Designed to deliver maximum safety in wet and snow conditions for the life of the tire.

This premium, all season steel-belted radial was tested for millions of miles for traction, fuel economy, cornering, durability, high-speed performance, noise levels, ride handling and long wear.

A tire that outperforms the world famous 721 could only be called — **Supreme.**
